

Athens Forum, 17 - 18th April 2008

Babis Vovos is Greece's leading property developer and manager, focused on the office real estate market. Since its inception in 1974, BVIC has constructed more than 30 office complexes with a total surface area of over 500,000 sqm.

The company is involved in all aspects of property development and investment, from site acquisition and construction through to the leasing and sale or retention of constructed building. It acts as facilities manager for all the properties in which it retains an interest or in respect of which it has entered into sale and leaseback transactions. Over the last few years, leveraging on the advantages offered by sale and leaseback agreements, it is moving increasingly from the development and sale of properties, to their development, retention and management. The group is also diversifying its portfolio by expanding into new real estate segments, so that now, it is involved in three major markets: the office market, the retail market and the vacation home market.

Market Cap.: €0,670bn
