

SAL. OPPENHEIM

Privatbankiers seit 1789

## *Athens Forum, 17 - 18th April 2008*

Daios Plastics S.A. has as a starting line 1977 (it was founded in 1974 as an ordinary partnership company mainly producing shopping bags). Within a short period of time the company focused exclusively in the production of specialised films for agricultural applications.

According to the company's philosophy of growth and innovation it has launched several products in the market which offered solutions to the problems that the farmers faced. In 1977 the company installed a blown film line producing a film with a variable thickness profile and it produces innovative patented films for drying tobacco leaves and raisins. Listening to the needs and requirements of the market and its customers the company continues to invest to its most important advantage: the production of ideas, integrated solutions and methods having as a sole goal the improvement of the quality and the increase of the farmer's income.
