

*Athens Forum, 17 - 18th April 2008*

**Metka** was founded in 1962 by the Industrial Development Organization and was involved in the manufacturing of metal constructions, while its plant in Volos started operating in 1964.

During its 42 consecutive years of operation, the Company acquired technological know-how, by constructing innovative projects of high-technology and demand, and of high added value. From simple metal constructions in the early years of its foundation, METKA currently is expanding and strengthening its position in the Energy Production Sector, constructing power plants as an EPC Contractor, as well as in large Infrastructure Projects, specialized Industrial constructions and Defence systems, as an equivalent partner in consortia or group of companies.

**Market Cap.:** €0,633bn  
**Sector:** *Industrials*
