Aleo Solar is a pure module producer.

The produced modules are marketed under the aleo brand. Its main customers are installers and solar specialized dealers. The company has a strong supplier base with established players and is currently expanding its production facility to 180MWp by the end of 2008. It is active in Germany, Spain, Italy and other promising countries. Moreover, with its 19% stake in Johanna Solar Technology, aleo has access to thin film technology.
