

Milan Forum, 14th March 2008

Corinth Pipeworks S.A. is a steel pipes manufacturer.

The company produces large and medium diameter steel pipes used in the transmission of oil, gas, water, and the construction industry. The strategical geographic position of the company, with the own private industrial port at the production plant, at the crossroad of the European existing & projected oil & gas pipelines from Africa, Middle East, Russia to Europe make possible lower transportation costs and higher margins than competitors from China and India.

Market Cap.: €0,58bn

Sector: Steel
