

SAL. OPPENHEIM

Privatbankiers seit 1789

Milan Forum, 14th March 2008

Smartrac's principal activity is the manufacturing of radio frequency identification ("RFID") inlays for contactless payment cards and ePassports.

These RFID inlays enable data to be transmitted to a reader via radio waves. The Group sells these RFID inlays to card manufacturers and secure printing houses. The Group operates in two segments. The "standard" segment includes "mass transit & access control" and "logistics" product lines and the "high security" segment includes "ePayment" and "ePassports" product lines. The company is registered in The Netherlands with a sales office based in Germany and production facilities in Thailand and Singapore. Since the 20th of July 2006 its shares have been traded on the German Stock Exchange.
